

Serviceable Clothes for Life in the Open

The practical features embodied in the various Duxbak Garments shown in this catalog and the well-established reputation for quality that Duxbak has earned over the years are good reasons why you should buy and wear Duxbak. No eye-catching but useless frills, but real quality, proven designs, and fine workmanship, at moderate cost, make Duxbak truly economical to buy and satisfactory to wear. You can pay less and get less, you can pay more if you wish, but you cannot buy better value than Duxbak.

We have always told our customers, and we tell you now, that . . .

"If any Duxbak garment fails to make good, we will."

We do not guarantee Duxbak to be absolutely waterproof. Such a claim cannot be maintained unless the cloth is impregnated with rubber or some similar material which destroys the essential ventilation that allows the evaporation of body heat and moisture. Duxbak is as water-repellent as it is possible to make a cloth without destroying these essential features.

The other garments shown in this booklet are as well made and as carefully inspected as is Duxbak. For the price at which they are sold they are good value and will serve you well.
